

Wisconsin Bike Patrol

Special Events **EMS**

Who we are:

We are Good, Caring people, with Medical Training, who Volunteer our time, to Help those unfortunate 'athletes' who get injured while participating in Athletic Endeavors, where 'Medics on Bikes' can get to the injured quicker and easier than other EMS Units.

Our Qualifications:

All of our TEAM are Medically Trained First Responders (WFA, O.E.C., EMT-B, or above, which are our Minimum Requirements for being on our TEAM). Most of our TEAM are, or were, Paramedics, Trauma Nurses, M.D.'s or have higher diverse Training levels. Many of our TEAM are, or were, Professional Firefighters or Police officers, who still want to be active with their skills, out of their 'work' uniforms.

What we do:

We cover Medical situations, at mostly Mountain Bike Races, but for variety, we also cover CycloCross Races, Road Races and Rides, Marathons and Triathlons! At Mountain Bike Races and CycloCross Races, we are 'bike' mobile – meaning we are Riding our bikes along-side the Racecourses, or on the Racecourses riding with the Racers, observing the 'athletes', while looking for those who may need Medical, or mechanical assistance, or for 'downed' Racers who need help (we are Trained on how to move out of the way of Racers if on Racecourses).

At Most Events, we will have a Medical Tent, or Medical Trailer, to treat 'walk-ins' or those who we have extracted from the Racecourses. We do have Medical UTV's for transport of the injured from off the Racecourses back to our Medical Tents or Medical Trailers.

On 'Road' Events, we are either bike or vehicle mobile. If on Bikes, we ride along, mixed in with the Racers, ready to assist any Racer in need. If in vehicles, we ride alongside the Racers on the Road, again, ready to Assist.

Event Requirements for WBP participation:

A '\$' Donation, of the Race Directors choosing, to the WBP. Patrollers are all Volunteers – No one gets Paid. The \$ Donation goes toward the supplies we use, and the Equipment we Need to have, to do what we do, which is to Medically Help those in Need.
